

**FOR OFF ROAD/RACE USE ONLY!**

**Driven Throttle Tube**

**Part#: DTT-XXX**

**INSTALLATION INSTRUCTIONS**

Prior to installation please know the following:

**This product must be installed by a qualified mechanic!**

**This product is intended for close course use/competition use only!**

\*You will need to remove your grip off the O.E.M. throttle sleeve and may not be able to reuse it.

**Installation instructions:**

1. Remove the throttle housing.
2. Loosen the throttle cables and remove them from the throttle tube.
3. Remove O.E.M. throttle sleeve.
4. Remove the stock grip (take care if you want to reuse it).
5. Use the included grease packet to grease the inside of the tube (make sure it's a thin layer).
6. Install the tube and fit the cables in the same order they were removed.
7. Reinstall the throttle housing.

**Note:**

Prior to riding the bike make sure the throttle cable works smoothly and is not binding. Start the bike in neutral and twist the throttle to make sure the bike returns to idle. Independently move the bars from side to side as the bike idles and make sure engine rpm doesn't change.

**THIS PRODUCT IS INTENDED TO BE INSTALLED BY A CERTIFIED TECHNICIAN\***
